Viking Optimizes Fleet-Wide Distribution of Technical Publications Utilizing ATP Digital Services

Oshkosh, Wisconsin, July 23rd, 2018: Viking Air Limited of Victoria, British Columbia has signed a Memorandum of Understanding with Aircraft Technical Publishers (ATP) of Brisbane, California for the digital conversion and distribution of all technical publications for the entire fleet of Viking aircraft.

As the OEM for the legacy de Havilland fleet (DHC-1 through DHC-7) and Canadair CL-215, CL-215T, and CL-415 aerial firefighters, Viking recognized modernizing and optimizing delivery of technical publications was key to providing global customer support services to a diverse group of aircraft operators.

The digital technical publication services provided by ATP will enable operators of Viking aircraft to gain web-based access to technical publications and tablet-based flight and operation manuals, in addition to the continued provision of paper-based publications.

“The increased delivery response rates, simplified business process, and improved document management derived from digital publications will streamline services and reduce management efforts,” commented Gregory Davis, Viking’s vice president Customer Service and Product Support. “This initiative is another major step in honoring our commitment to providing world-class support to our customers.”

About Aircraft Technical Publishers:

Aircraft Technical Publishers is the aviation industry’s premier provider of information tools and services for manufacturers, operators/owners, and maintenance providers. ATP partners with more than 50 manufacturers to help thousands of customer in nearly a hundred countries to ensure the highest levels of airworthiness, equipment and business performance, aircraft value, safety, compliance and productivity.

About Viking Air Limited:

Headquartered in Victoria, BC, Viking is the global leader in utility aircraft services, and the manufacturer of the world-renowned Series 400 Twin Otter. Viking is the Original Type Certificate holder for all out-of-production de Havilland aircraft, DHC-1 through the DHC-7, and provides exclusive spare parts manufacturing and product support for the legacy de Havilland fleet. In 2007 Viking launched the Twin Otter Series 400 production program, and to date new Viking aircraft have sold to 30 countries worldwide.

VIKING is the manufacturer of the Twin Otter Series 400 aircraft, and provides complete support for the de Havilland legacy fleet.

In 2016, Viking acquired the Type Certificates (manufacturing rights) for the Canadair CL-215, CL-215T, and CL-415 aircraft. With this transfer, Viking assumed responsibility for all product support for the global fleet of 170 aerial firefighters.

Viking is managed by Longview Aviation Capital and forms part of the portfolio of a prominent Canadian family investment firm that maintains a long-term investment horizon and is one of the leading investors in the Canadian aviation industry.
